Education

UC Santa Cruz | Computer Science M.S. Thesis Plan Option| Expected Graduation: June 2024

C.S.U. San Marcos | Graduation: May 2022 | Computer Science B.S. & Mathematics Minor | GPA: 3.81| Magna Cum Laude

Coursework:

CSU San Marcos: Data Structures and Algorithms, Programming Languages, Computer Architecture, Linear Algebra, Optimization, Discrete Mathematics, Intro to Deep Learning, Numeric Analysis, Intro to Artificial intelligence, Software Engineering

UCSC: Machine Learning, Artificial Intelligence, Analysis of Algorithms, Programming Languages, Advanced Topics of Machine Learning, Social Computing Research: Design, Algorithms, and Incentives (Fall 2023: Ongoing), Seminar in Interactive Systems for Individuals with Special Needs (Fall 2023: Ongoing), Topics in Crowdsourcing and Collaboration (Fall 2023: Ongoing)

Scholarships and Honors

CSUSM Dean's List: Fall 2018- Spring 2022

Projects

Finding a Safe Area([devpost](#))**-** *New Hacks Who's This? Hackathon*

- This app was designed with creating a safe and up to date information bank that users can access to make better-informed decisions about where they would like to go visit or hang out with each other at safe/no crowded spaces.
- Utilized HTML for creating a website and allowing the utilization of a chatbot in the front-end development.

I Am Not Alone([devpost](#))- Same *Home Different Hacks Hackathon*

- A chatbot was created and embedded in a website to fight against suicide and COVID-19 related depression.
- Utilized HTML to allow the creation of a website for a chatbot embedded in a popup window

We Are Not Forgotten([devpost](#))- *RookieHacks Hackathon*

- The objective is to create maps of stories from families, who are affected from their decreased relatives, like the Snapchat app's feature of maps contained stories from users internationally.
- Utilized HTML for creation and graphics of a website

Experience

UCSC Teaching Assistant- 10/2022- 3/2023: Grades students' assignments from programming assignments, quizzes, exams, and final exams. Creating Discussion sections related to the covered contents from lecture to prepare students for performing well on their programming assignments, quizzes, labs, and the final examination. Organizes 2 discussion sections weekly and weekly office hour to assist students on concepts along with assisting students on their homework, lab, and understanding concepts from lectures. Manages the gradebook and communicates with supervisor on ensuring priorities being met. Proctored students to enforce academic honesty and answer general questions on their exam during exam day and final examination's day.

Courses: CSE 20(Beginning Programming in Python): Fall 2022 Quarter, CSE 12(Assembly Language and Digital Circuits) Winter 2023 Quarter

Technical Skills

Programming Languages: Python, C++, HTML, and CSS

Tools & Programs: MS Visual Studio & GitHub
